Evidence

Increase sales and reduce costs

25%

reduction in proposal and project cost estimating effort¹

80%

of the project margin is determined at the bid phase²

10%

higher win rate in sales pursuits³

“

Twenty5 has given us a single source of truth for all our proposals and the means to drive continuous improvement in our bidding process.

”

Wynn Baum, Managing Partner, Delaware North America

Professional services industry challenges

Firms must meet the changing demands of the industry by:

Estimating accurately for fixed-price and outcome-based projects

Creating a single source of truth for bids and estimates

Working collaboratively with colleagues and partners on global bids

SAP's industry cloud

SAP's industry cloud is an innovation and transformation platform that equips you to push your business forward faster. Platform solutions include business applications and technologies from SAP and its partners that are built on, or integrate with, SAP® Business Technology Platform.

The Integrated Project Pricing & Estimating (iPE) solution from Twenty5 is an industry cloud solution that enables professional services firms to:

Bid with confidence based on better insights

Get accurate proposals out the door faster

Contain costs and maintain margins

Continuously improve and refine from bid to bid

About iPE from Twenty5

Rely on a single source for all your estimates.

Built-in best practices, historical bid information, and project actuals

Powerful estimating algorithms

Embed risk and confidence in your estimates to derive risk-adjusted cost and margins

Integrated with the SAP ERP application

Benefits

Bid more effectively and win more profitable business.

Improve bid win rates

Increase project margins

Reduce RFP response time and effort
